Designed for fast entry through a keyboard input, this system is the most efficient and easy to use POS and Accounting Management system available today

The latest Microsoft 32bit OS gives the best combination of superior graphics - user interface and robust networking capability.

The PC based open system protects and minimizes your hardware investment while providing maximum flexibility in hardware selection.

The complete and easy way to control your florist business; a system designed for stores that need simplicity, power and flexibility!

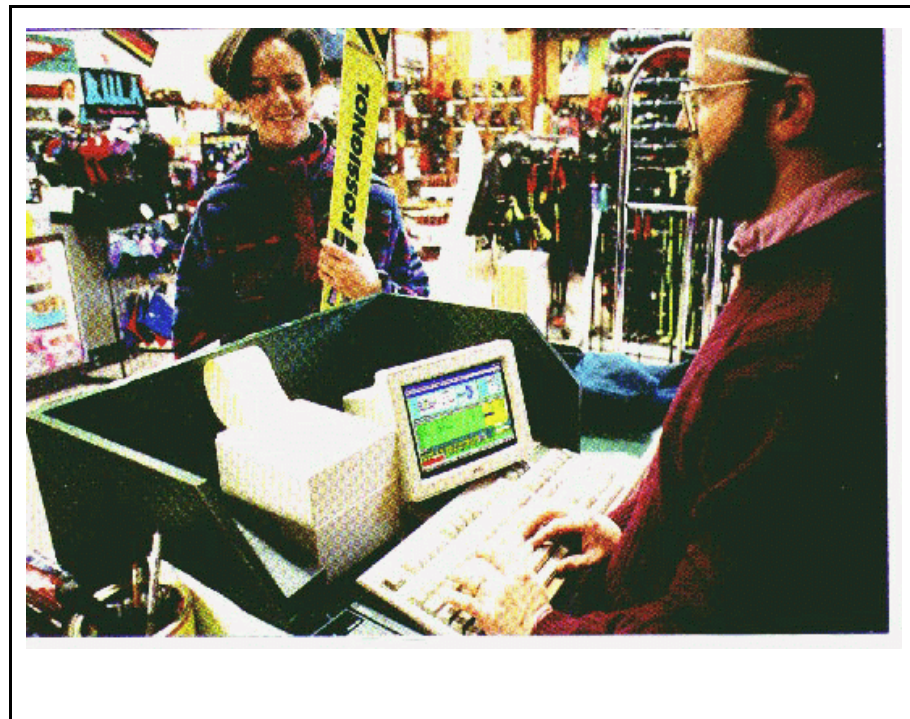

Finally a Windows POS and full accounting system designed to service the retail business.

It's perfect for a retail Business.. Classic 2000 plus turns any PC into a super smart management system that increases your profit significantly.

It will improve your overall operations, especially in inventory control and check out. Classic 2000 plus registers sales, prints fully itemized receipts or invoices, receives and tracks inventory and prints sales reports, including re-order reports.

Easy to learn and operate... Classic 2000 plus was designed for the first time computer user. It was also designed with enough sophistication that's required by the more seasoned users.

Numerous "pull-down" menus and "point-and-select" windows make the program intuitively easy to use. Even a new clerk can learn to ring transactions in minutes. Transactions can be scanned in by the bar code, keyed in or selected from a pull down list, all of which helps a clerk produce a fully itemized receipt quickly and easily.

Classic 2000 plus, helps you know....

What's in inventory right now? Which products are slow movers? What sales are for the day, the month, the year? What sales are by category, or by product group? Who

Replace your cash register with a cash generator..

Can your cash register tell you what's in stock, control your inventory, check and correct prices, automatically, provide quicker service, get more repeat business and optimize your purchasing?

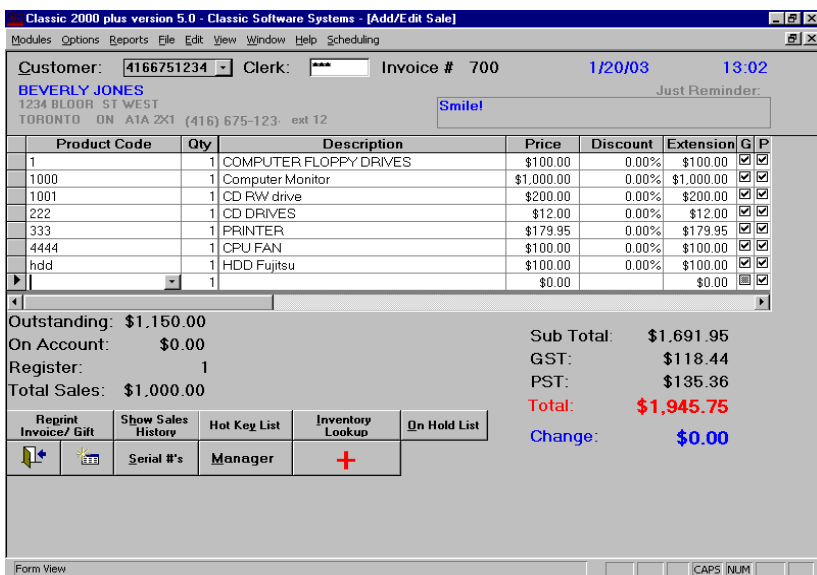

are your customers and what they like to purchase?

Classic 2000 plus can help you stay ahead of your competition, reduce your shrinkage, billing errors, cost and time. It puts the profit-building speed, accuracy and power of PCs to work for you.

A partial list of features in the program is listed on the next page.

For more information, call:

800-200-5379

As each transaction is completed, the products sold are quickly and automatically deducted from the current amount on hand in inventory.

All of this information and much, much more is collected for you and is available to you at the touch of a button.

HOW DO YOU START?

Automation can be one of the trickiest decisions you will ever make. Just finding the right solution can be a complex process and then you have to learn how to use it. However, when done with patience and careful planning; going "on line" can make a world of difference in the efficiency and profitability of your business.

Here are some suggestions on how to make your selection:

* **BECOME AN EDUCATED BUYER**

go to the library, another business that is automated, or your business association, etc.

* **KNOW WHAT YOU WANT**

make a list of what you want. Start with the most important items and work your way down to the least important.

* **SELECT BASED ON VALUE**

while price is important, don't make your selection based on price only. Get a complete quote and have everything itemized and individually priced. Make sure that warranties and guarantees are clearly shown.

* **TEST DRIVE THE PROGRAM**

most software is available in a demo form so that you can "test drive" the program.

Classic provides demos at our office in a special demo area or we can arrange for a on site demo by one of our sales representatives or dealers. We also offer a demo kit, which includes a working copy of the program, complete with manual at a cost of \$29.95.

BASIC START UP SYSTEM -

SUGGESTED HARDWARE

- * any PENTIUM computer
- * 64 MB to 256 MB ram
- * 500 MB or larger hard drive
- * cd rom / floppy drive

- * **GENERAL POS** for medium to large businesses.
- * **SPECIALTY POS** for specialty businesses, such as auto, drycleaners, hair salons, video stores, convenience stores, restaurants, etc.

OTHER SUGGESTIONS:

- * training
- * support
- * power backup/ UPS
- * pc anywhere

FLORIST MANAGEMENT SYSTEM BACKOFFICE

Classic Software spent several years developing a complete ACCOUNTING SYSTEM.

Besides being an accounting software package, it incorporates all the features needed to assist in the running of your business, such as comments and notes boxes for all customers, vendors and contacts.

You can add a new contact to the system, give them a quote, follow up on the quote, convert the quote to a sales order and be able to place purchase orders for any out of stock items all on one screen. Nothing could be simpler !

WE OFFER A COMPLETE POS SOLUTION :-

Classic Software offers a complete one-stop solution to computerizing a business, with twice as many features at half the price. We offer a complete solution, including software, computer, cash drawer, receipt printer and bar code readers and anything else you or your clients may need to computerize their business.

If you already have a software program but are not happy with it, then we can assist you to convert your existing database to that of CLASSIC 2000 plus, quickly !

If you need special options or features, we can customize the program to suit whatever needs you may have.

Send in your request to our Programming team and they will provide a flat rate quotation by return. If your custom request is one that the programming team believes will enhance the overall operation of CLASSIC 2000 plus then the feature or option will be included in the program at no additional charge.

OR PURCHASE WHATEVER COMPONENTS YOU NEED:

Classic 2000 plus POS & ACCOUNTING system is available as a modular system. Purchase the modules you want to start with and add on to the system as your business grows. The data, from whatever modules you use posts to all the other modules in the system, so that when you purchase access rights to additional modules, all the data is already there.

Besides the software, all the computers and peripherals are available separately, check the price list for further information.

For more info call: 800-200-5379

PAYMASTER 2000 *plus* PAYROLL

PAYMASTER 2000 PLUS PAYROLL

is a Windows based payroll program that works as a stand-alone or as part of the Classic 2000 plus system.

As part of Classic 2000 plus, all entries can be posted automatically to the general ledger system in Classic 2000 plus.

With extensive other income codes and other deduction codes, this system can easily handle the large business' that need this level of sophistication for it's employees.

The program tracks multiple Union Codes, multiple Workers Compensation Codes and prints the reports required for both these areas.

Along with the hourly, salaried and commission employees of the Basic System, this program also handles the Independent contractor with the ability to charge GST when required.

The employees can be paid by cheque or by direct deposit.

Customization is also available. Should you need to custom tailor Paymaster 2000, just call for a quote.

We also encourage suggestions to the improvement of the program. You have any suggestions, please let us know and we will try to incorporate these into the next update.

Demo Kits are available. These are working copies of the program complete with manual.

FEATURE LIST:

- C extensive other income codes
- C extensive other deduction codes
- C retail all previous years history
- C direct gl posting
- C 13 methods of calculation
- C 4 income types

- C This program can be customized to tailor it to suite whatever needs you may have.
- C All customizations are quoted flat rate based on your specifications.

SYSTEM

Available for Windows 95/98, CE, ME, XP, NT, 2000

Written in vb & ms access

PRICING :-

DEMO KIT	\$29.95
MULTI USER	\$395.00
MULTI COMPANY	\$495.00
MULTI SITE	\$595.00

Like all the other software developed by Classic Software, this one aims to provide you the most complete solution in handling your payroll and is fully integrated to the Classic 2000 Plus POS & ACCOUNTING SYSTEM.

This program also works as a stand alone product.

Written for the Windows environment, this program works with you to ensure that you can use your keyboard for most of the input functions, rather than having to rely on a mouse.

This program is very fully featured. One of the main features is that different pay cycles are handled in one payroll company, allowing you to have a weekly payroll for one section of your business and a biweekly one for another.

The program will consolidate all the cpp, ei and tax remittance into one report, regardless of the pay cycle.

The program also handles commissions and will calculate and deduct GST due on commission.

This program works on its own or will integrate directly with CLASSIC 2000 plus.

A multi site version is available; this will allow the transference of data from remote locations to head office.
